

Allscripts MyWay

The Benefits of a Hosted MyWay Solution

The MyWay Hosted Solution: Capability without Complication

Small practices don't have the budget, time or space to maintain hardware or a server room. But they must have PM, EHR, billing and other critical systems to provide the best possible care and run their organization as efficiently as possible. That's why Allscripts MyWay gives you the option of operating all of your essential practice systems in an entirely hosted environment.

What this means is that all equipment is managed by Allscripts. There are no lengthy hardware implementations, no expensive equipment to maintain and the freedom to get back to the primary tasks of running your practice.

SMART DISASTER RECOVERY

When it comes to disaster recovery, you may already employ a tape backup. But in the event of a fire, natural disaster or other emergency, tapes can be destroyed along with your building. By hosting MyWay in an offsite facility, all of your critical patient and practice data is assured no matter what happens at your physical practice location. MyWay is always ready and waiting when you need it.

SAFE, SECURE OPERATION

Allscripts utilizes a SAS 70, Type II certified data center supported by 24 x 7 x 365 onsite staff to ensure 99.9% MyWay availability. Combined with the latest building and ASP security protocols, you can rest easy that you are protecting sensitive patient data and maintaining HIPAA compliance.

SOLID RELIABILITY

Allscripts MyWay is hosted at an elite, state-of-the-art data center that features:

- > Steel structural supports and concrete walls
- > Redundant power distribution and backup power generation, enabling indefinite operation
- > Building strategically located outside of severe weather and seismic zones
- > Lightning and hurricane force wind protection throughout the data center
- > Leak detection system

"I know that having the data backed up in several different places definitely makes me much more comfortable, and I appreciate not having to do it myself."

*Dr. Peter Forman, Primary Care Physician
Delmar Family Medicine*

Benefits

- > The fastest way to implement Allscripts MyWay
- > Robust ROI through the elimination of expensive implementations and cost predictability through a simple monthly fee
- > No hardware onsite—freeing up valuable space in your practice
- > Eliminates the need to hire IT support staff
- > Offsite disaster recovery assures patient and practice data in the event of an emergency
- > HIPAA compliant, secure technology

Allscripts MyWay

The Benefits of a Hosted MyWay Solution

- > Redundant AC systems that filter dust and lint
- > Containment basins and sensors that eliminate moisture
- > 24-inch raised floor to provide ventilation for more efficient and effective cooling of computer equipment

ROBUST PROTECTION

Allscripts MyWay—as well as patient and practice data—is protected by the latest security including:

- > 24-hour physical security that monitors all cameras, door positions, and badge access areas
- > Redundant off-site monitoring of all security systems
- > Ballistics-proof walls, doors, and windows
- > Biometric hand scanner that verifies unique hand geometry image and heat signature before allowing entry into data center

The data center that hosts Allscripts MyWay recently completed an expansion to 31,000 square feet—making it one of the premier technology facilities in the Eastern United States.

Launch MyWay Today

With the hosted version of Allscripts MyWay, you can get up and running faster than ever before. Your organization can start experiencing the full value of PM and EHR in a format that's simple to use and cost effective to operate.
